## MARINE FABRICS

Riviera Enclosure Bordered with Steadfast<sup>TM</sup>

Boss Lady Stays Cool with Steadfast<sup>TM</sup> Marine Cover

### Congratulations...

**You Have Discovered  
the Finest Fabric Available  
to Grace & Protect Your Vessel!**

*More & More Top Canvas Shops are Using  
Steadfast<sup>TM</sup> to Meet the Demands of Savvy  
Boat Owners. Does Your Canvas Craftsman  
Know About Steadfast<sup>TM</sup>?*

**STEADFAST<sup>TM</sup>** was created by a veteran of boating (50+ years experience) and marine canvas fabrication (40+ years experience) specifically to overcome issues experienced during real boating in real conditions. **4 GOALS WERE SET:**

1. Produce a Fabric to Withstand Everything the harsh marine environment offers from ocean salt to Cape winds to Florida sun.
2. Must Possess Tear Strength able to hold fasteners and stitching in extreme pressures.
3. Must be "Easy Clean" white, snow white and cream colored fabrics to match the majority of gel coats used today.
4. Must Exhibit a Rich Subtle Look worthy of and able to blend in with the lines of extraordinary vessels being built today and not detract from those same lines.

**Steadfast<sup>TM</sup> Meets & Exceeds these Goals!**

Grady White with Steadfast<sup>TM</sup> Cockpit Cover

### Steadfast<sup>1TM</sup>

An 11.8oz. per sq.yrd. single coated material with light weight and stow-ability making it ideal for console, cockpit, chair covers, etc. that get stowed frequently.

Hatteras with Bimini, Laced Sunshade & Enclosure  
Made with Steadfast<sup>TM</sup> Marine Cover Fabric

### Steadfast<sup>2TM</sup>

A 14.2oz. double coated material ideal for almost any cover requiring easy wipe off and clean-ability on both sides. Prized for enclosure fabrication, it is also ideal for bimini tops, lace or banded tops, etc.

### HOW THE GOALS WERE ACHIEVED:

1. Utilize a Tight Woven Polyester with a PVC Coating manufactured by a proven company specializing in technical textiles since 1944. They own the experience to beat the elements and the competition absent the arrogance preventing them from listening to boaters' and fabricators' concerns.
2. Employ a Tight Weave with Twice the Tear Strength of "TOP" Fabric on the Market, providing the ability to hold fasteners and stitches in extreme conditions.
3. Utilize an Acrylic Top-Coating providing superior UV resistance and easy cleaning.
4. Have a Light Emboss Balanced with a Perfect Wrinkle Resistant Weight and seam minimizing 84" width to impart a sophisticated elegant look worthy of the finest vessel.
